

Representative [Name],

I am writing as a constituent and licensed trapper regarding H.R. 4108. This bill shifts wildlife management from **state-led, science-based conservation** toward federal preservation ideology that ignores local data and conditions.

State fish and wildlife agencies already regulate trapping through population science, monitoring, and adaptive management. A federal tool ban on National Wildlife Refuge lands creates precedent that will be used to push broader nationwide restrictions later.

Please oppose H.R. 4108 and support state-led, science-based conservation. Thank you for representing constituents who actively steward wildlife.

Sincerely,
[Name]
[City, State]
